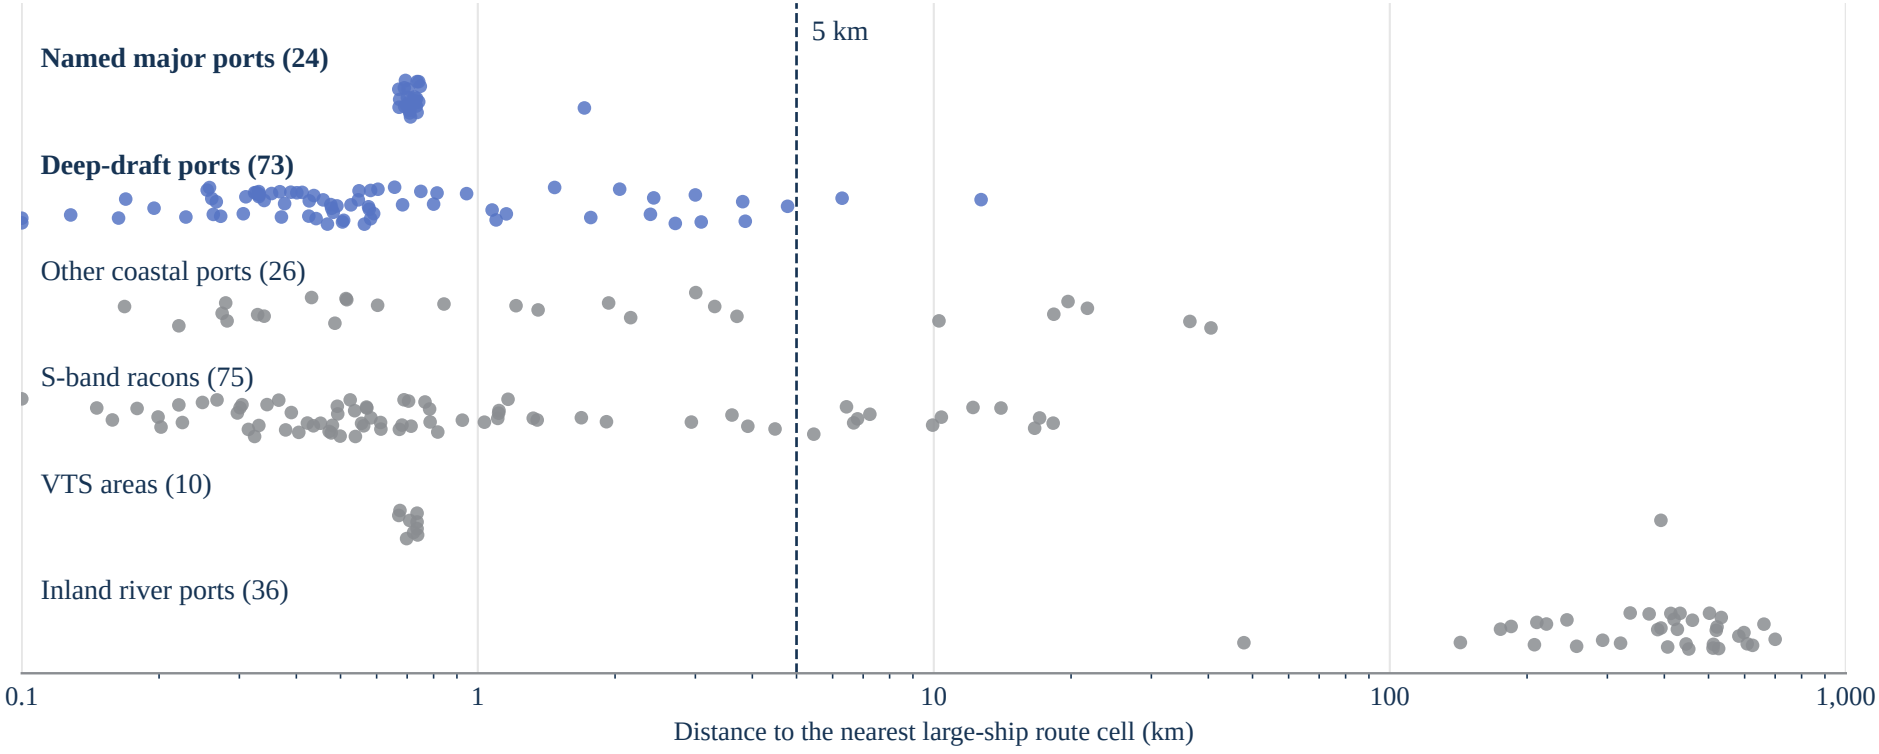
DRAFT//PRE-DECISIONAL

Every named major port and 97% of deep-draft ports sit within 5 km of a large-ship route; inland river ports do not

Distance from each site to the nearest large-ship route cell (log scale); each dot is one site



Source: NTIA analysis of MarineCadastre AIS, 104 sampled days in 2023 and 2024; large ships = cargo, tanker, passenger, military, and other seagoing ships 100 m or longer, plus tug-barges near the coast. Ports: USACE Principal Ports (deep-draft = coastal or Great Lakes, 1 million tons or more of foreign trade). Racons: NOAA ENC Direct. VTS: U.S. Coast Guard.
