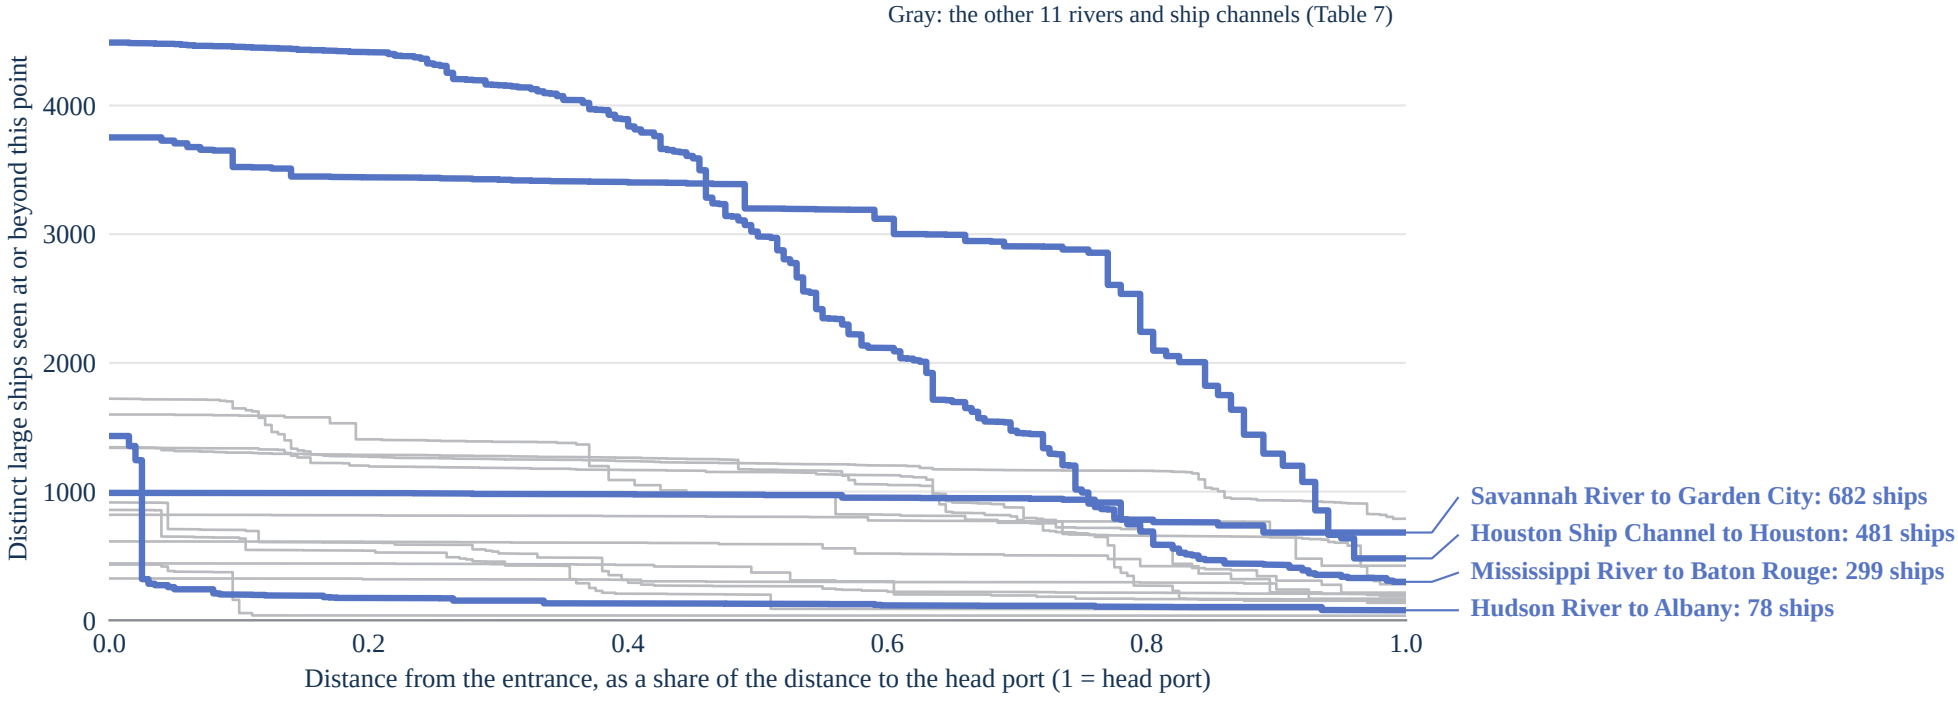
DRAFT//PRE-DECISIONAL

More large ships enter the Mississippi and the Houston Ship Channel than any other corridor, but only about 300 reach Baton Rouge and 480 reach Houston

Distinct large ships seen at or beyond each point of each corridor, 15 rivers and ship channels, 2023 and 2024 together



Source: NTIA analysis of MarineCadastre AIS, 104 sampled days in 2023 and 2024; large ships = cargo, tanker, passenger, military, and other seagoing ships 100 m or longer, plus tug-barges near the coast. Distance is measured along the large-ship route cells from the entrance. Counts start 3 km in from the entrance.
