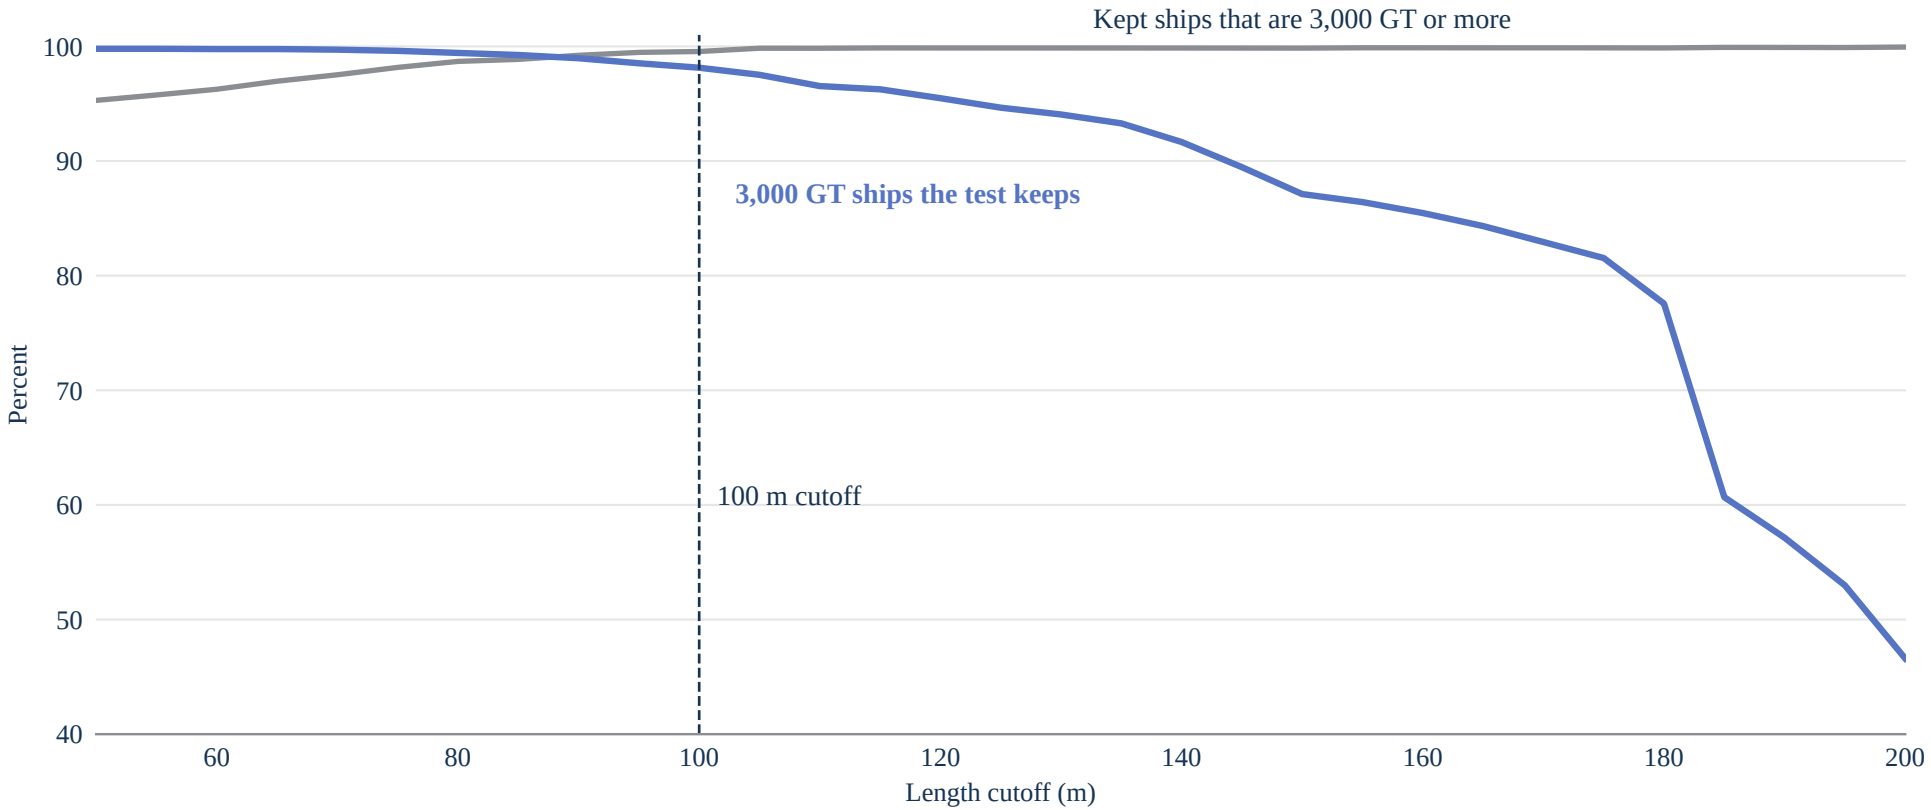
DRAFT//PRE-DECISIONAL

At 100 m, the length test is right 99.6% of the time and keeps 98.1% of big ships

Length cutoff tested against registry gross tonnage (3,000 GT, the SOLAS size for a 3 GHz radar), 4,129 cargo, tanker, and passenger ships



Source: NTIA analysis of MarineCadastre AIS (four days in 2024) matched by IMO number to Wikidata gross tonnage.
