85% of large-ship traffic is in cells that pass the threshold in both years

Route cells with 4 or more ships in both 2023 and 2024 (337,735 cells, blue) or in only one year (323,402 cells, gray)

Source: NTIA analysis of MarineCadastre AIS, 104 sampled days in 2023 and 2024; large ships = cargo, tanker, passenger, military, and other seagoing ships 100 m or longer, plus tug-barges near the coast.
