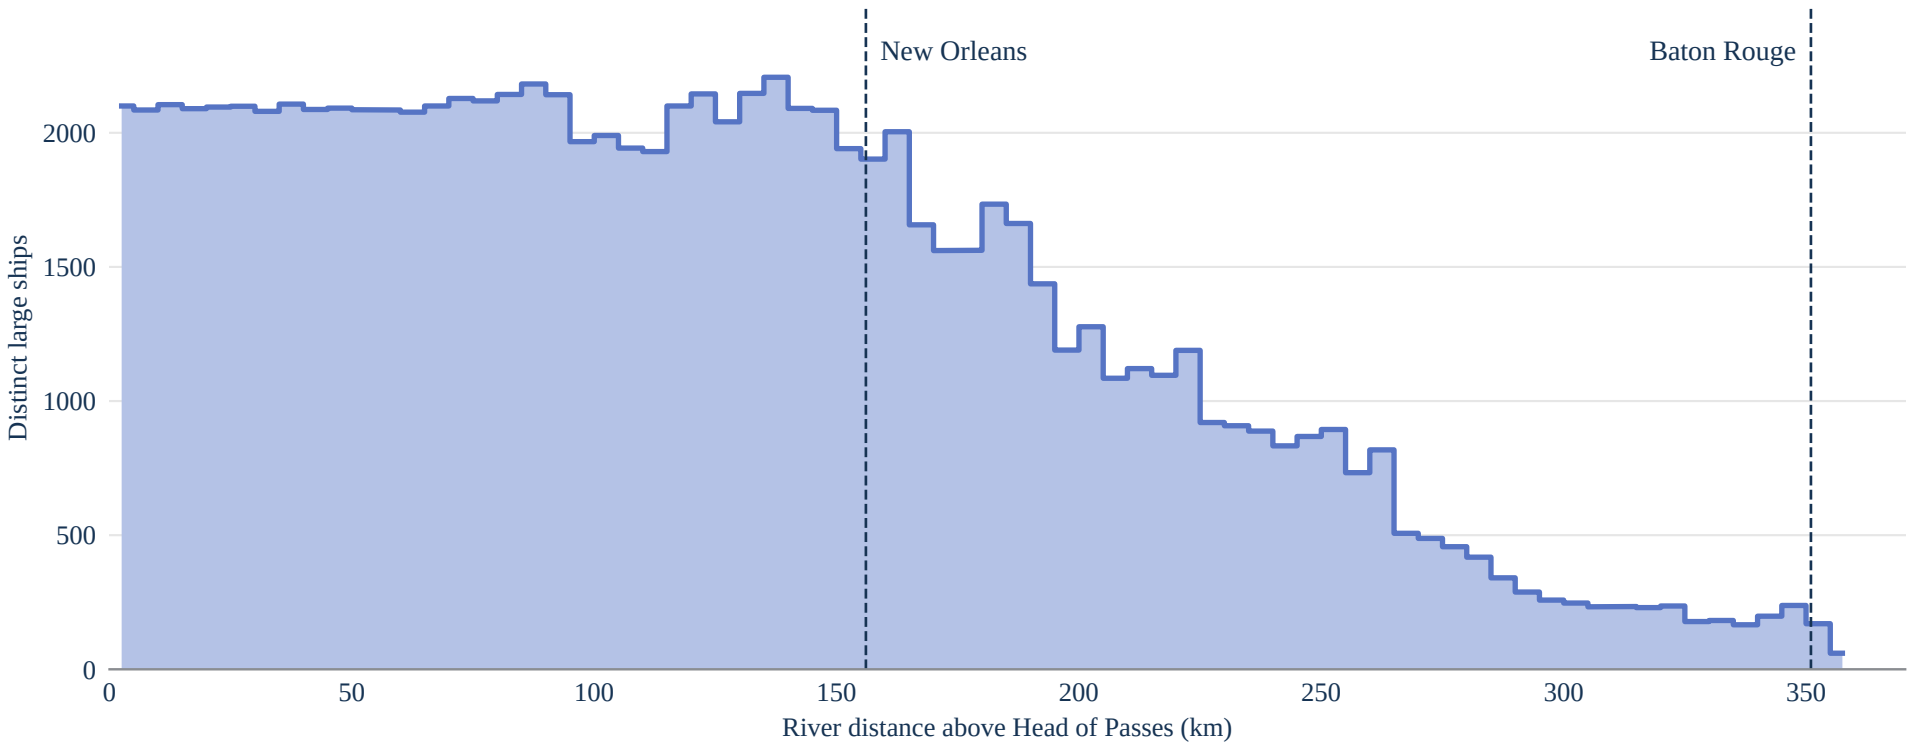
DRAFT//PRE-DECISIONAL

Traffic thins above New Orleans, but large ships still reach Baton Rouge, 351 river km upstream

Distinct large ships in each 5 km reach of the Mississippi River, 104 sampled days in 2023 and 2024



Source: NTIA analysis of MarineCadastre AIS, 104 sampled days in 2023 and 2024; large ships = cargo, tanker, passenger, military, and other seagoing ships 100 m or longer, plus tug-barges near the coast. River distance is measured through the route cells from Head of Passes.
