DRAFT//PRE-DECISIONAL

Galveston Bay, the lower Mississippi, Los Angeles-Long Beach, and New York tower over the rest of the coast

Spike height = distinct large ships per 25 km hexagon with 10 or more ships, 2024 and 2025 together (tallest spike: 3,206 ships)

Source: NTIA analysis of MarineCadastre AIS, 104 sampled days in 2024 and 2025; large ships = cargo, tanker, passenger, military, and other seagoing ships 100 m or longer, plus tug-barges near the coast.
