DRAFT//PRE-DECISIONAL

Away from the coasts, only the Great Lakes and a few deep rivers bring large-ship routes inland

Distance from each point of U.S. land to the nearest large-ship route cell

Source: NTIA analysis of MarineCadastre AIS, 104 sampled days in 2024 and 2025; large ships = cargo, tanker, passenger, military, and other seagoing ships 100 m or longer, plus tug-barges near the coast. Land: Census cartographic boundary states, 2023 (0.05 degree grid).
