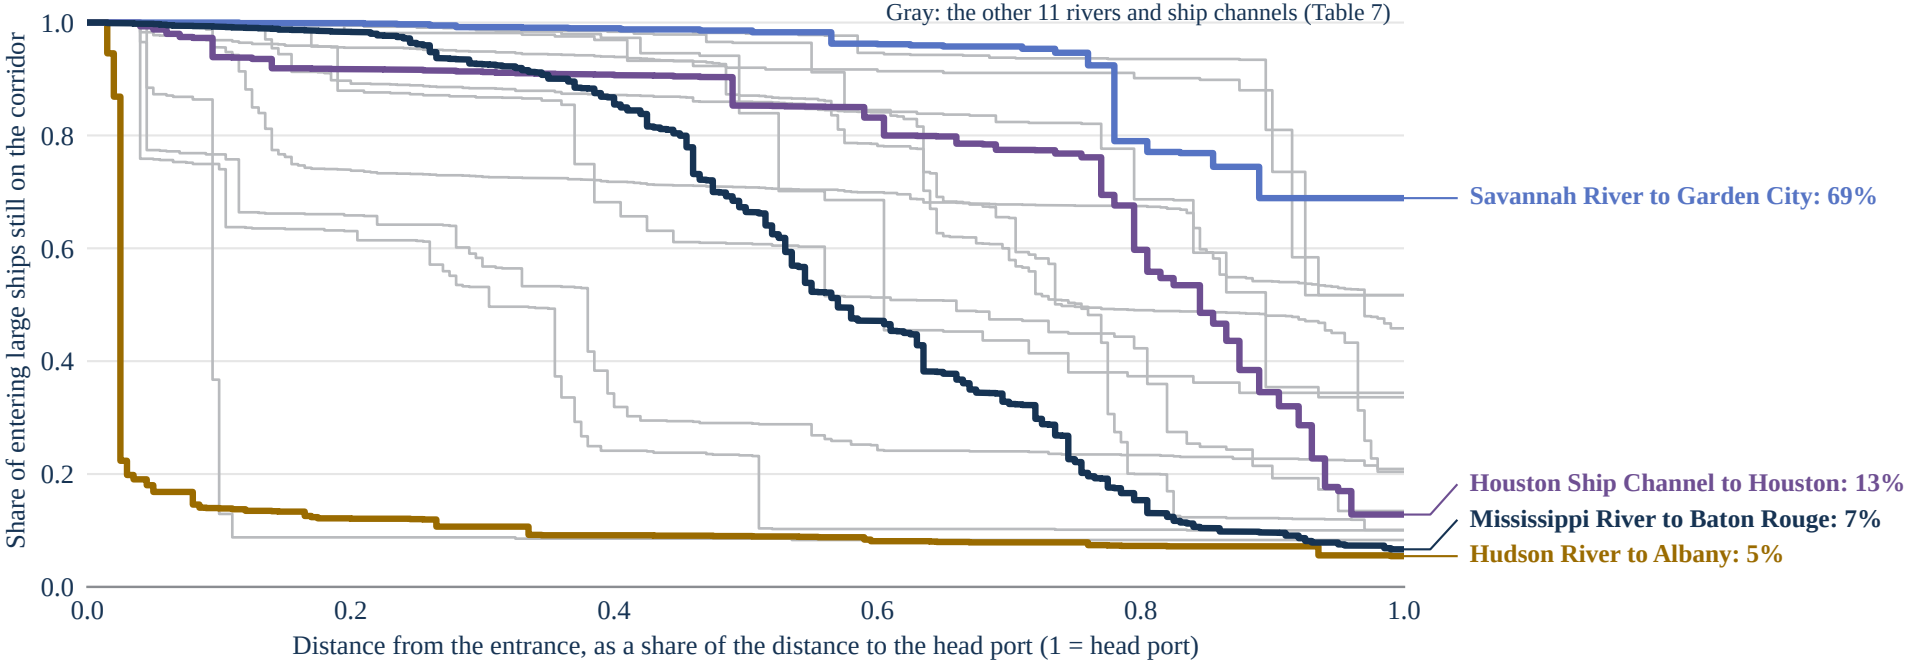
DRAFT//PRE-DECISIONAL

69% of the large ships that enter the Savannah River reach Garden City; on the Hudson and the Mississippi, fewer than 1 in 10 reach the head port

Share of large ships entering each corridor that were seen at or beyond each point, 15 rivers and ship channels, 2023 and 2024 together



Source: NTIA analysis of MarineCadastre AIS, 104 sampled days in 2023 and 2024; large ships = cargo, tanker, passenger, military, and other seagoing ships 100 m or longer, plus tug-barges near the coast. Distance is measured along the large-ship route cells from the entrance. Ships entering = seen at least 3 km in from the entrance on any sampled day.
