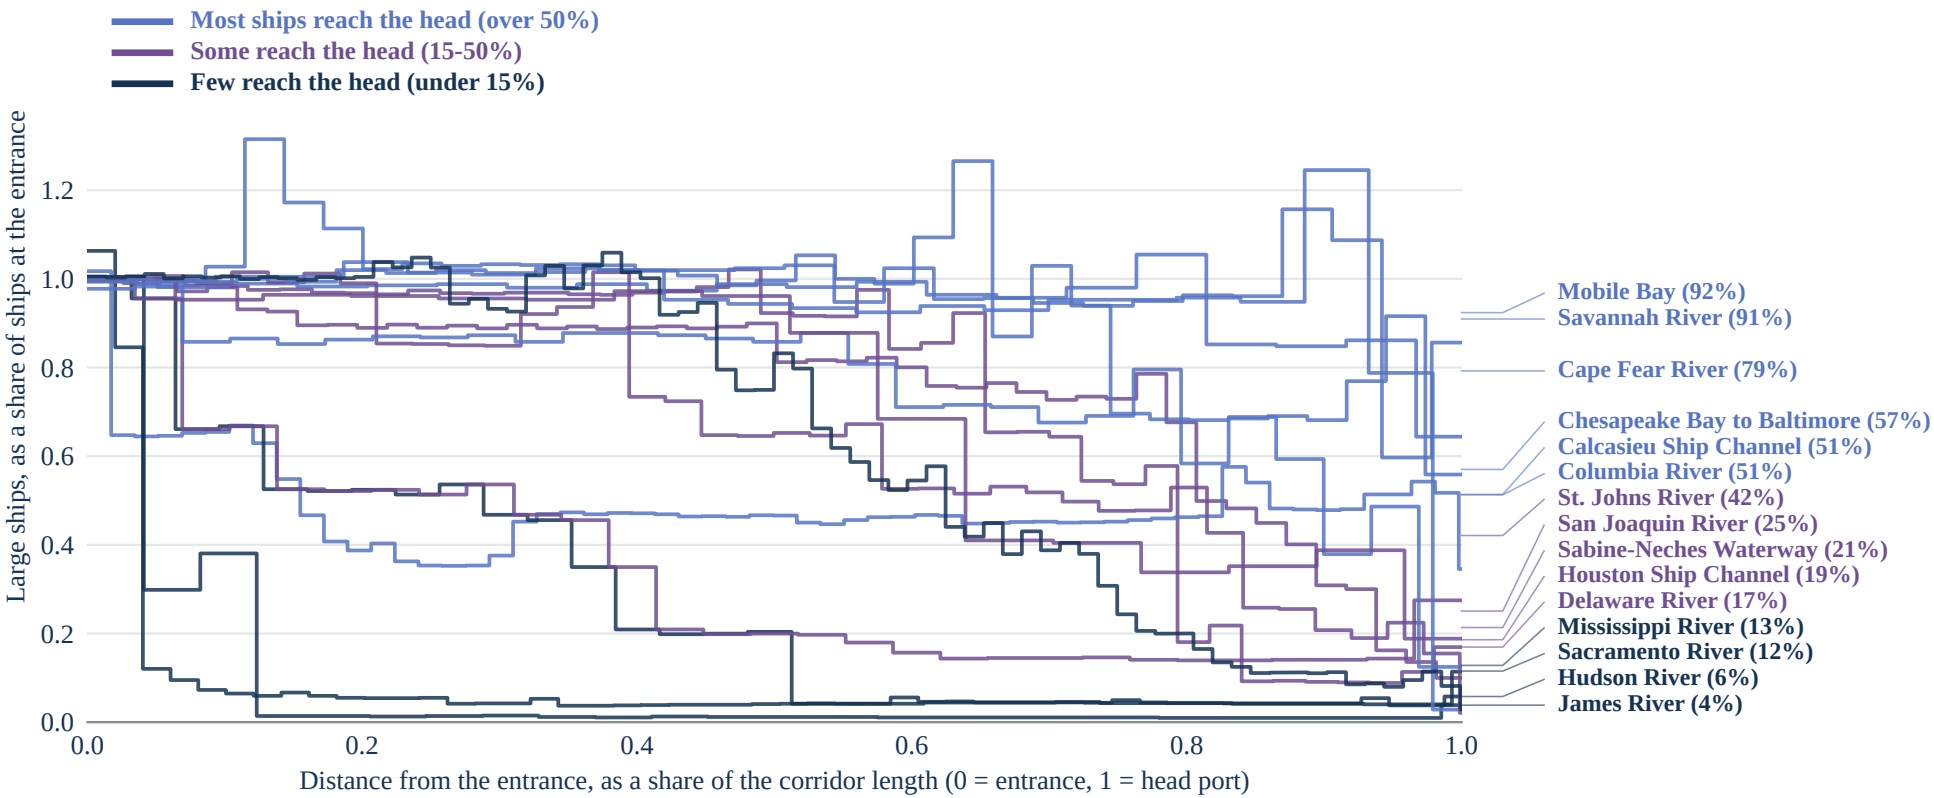
DRAFT//PRE-DECISIONAL

Mobile and Savannah keep 9 in 10 large ships to the head port; the Hudson and James keep fewer than 1 in 15

Distinct large ships in each reach as a share of ships at the entrance, against distance as a share of corridor length, 15 rivers and ship channels, 2023 and 2024 together



Source: NTIA analysis of MarineCadastre AIS, 104 sampled days in 2023 and 2024; large ships = cargo, tanker, passenger, military, and other seagoing ships 100 m or longer, plus tug-barges near the coast. Distance is measured along the large-ship route cells from the entrance. Entrance counts include ships bound for other ports near the entrance.
