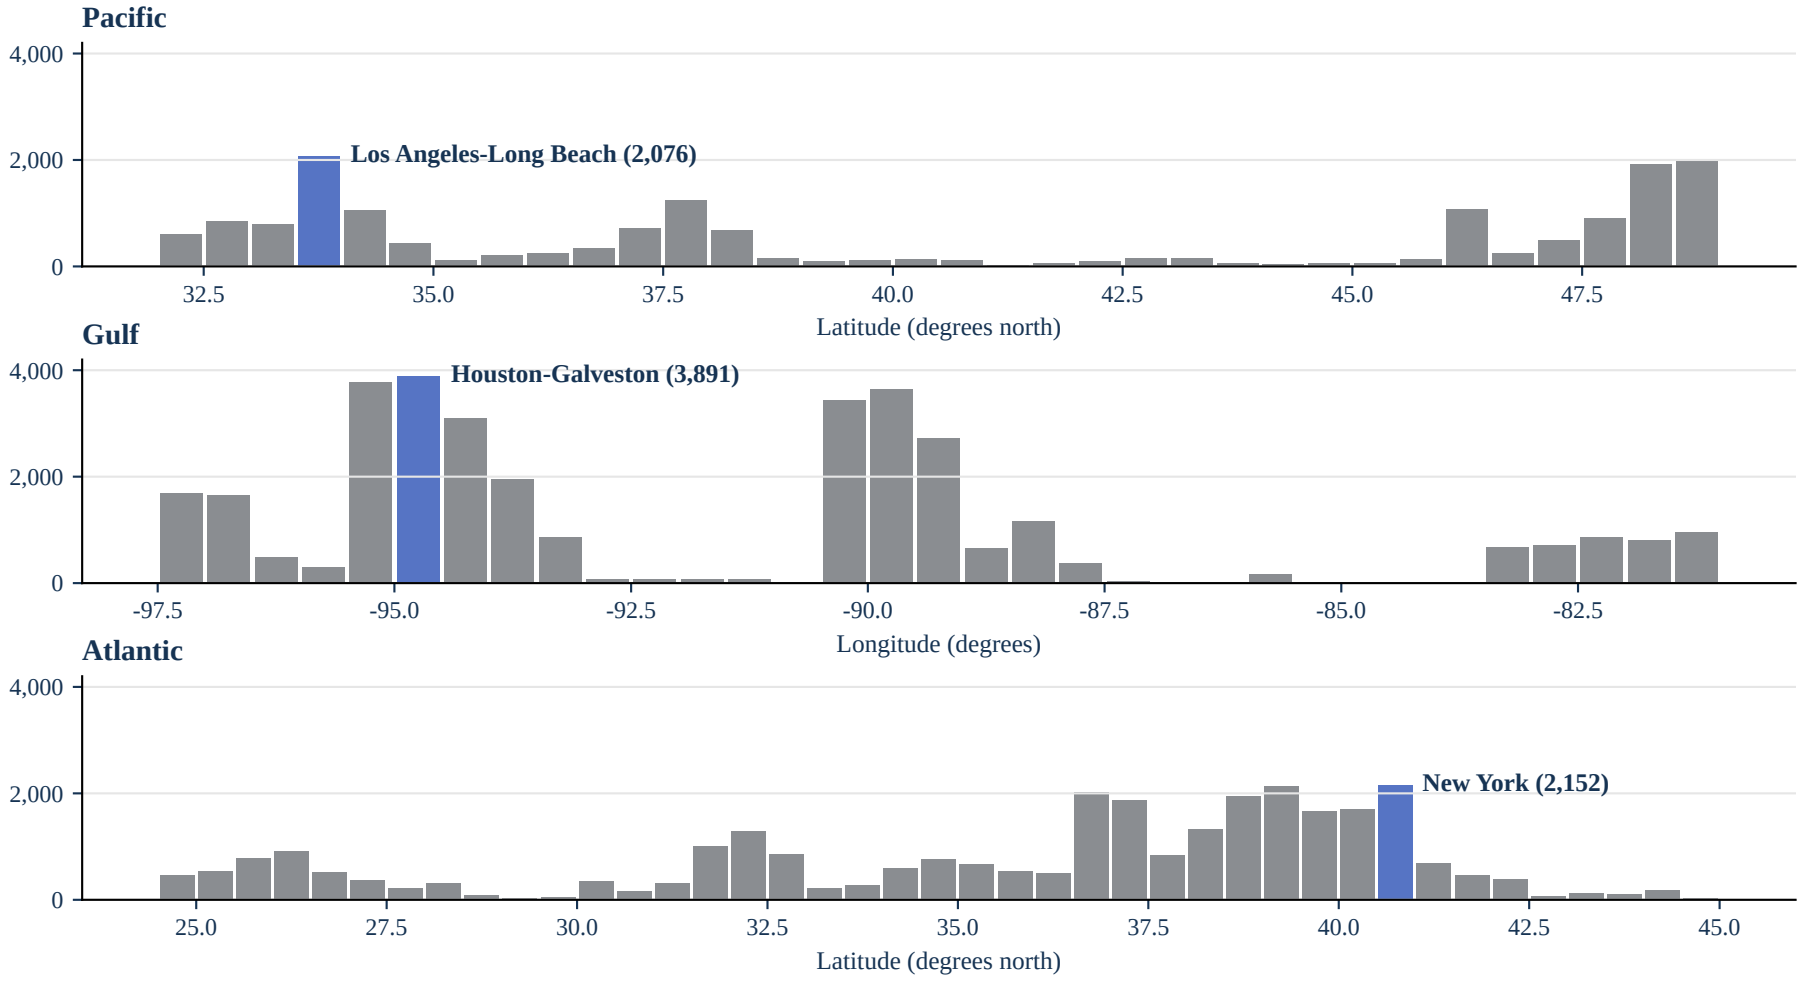
DRAFT//PRE-DECISIONAL

Near-shore traffic peaks off Houston-Galveston, New York, and Los Angeles-Long Beach

Distinct large ships within 50 km of shore in each half-degree along the coast, 2023 and 2024



Source: NTIA analysis of MarineCadastre AIS, 104 sampled days in 2023 and 2024; large ships = cargo, tanker, passenger, military, and other seagoing ships 100 m or longer, plus tug-barges near the coast. Pacific and Atlantic by latitude (south to north); Gulf by longitude (west to east).
