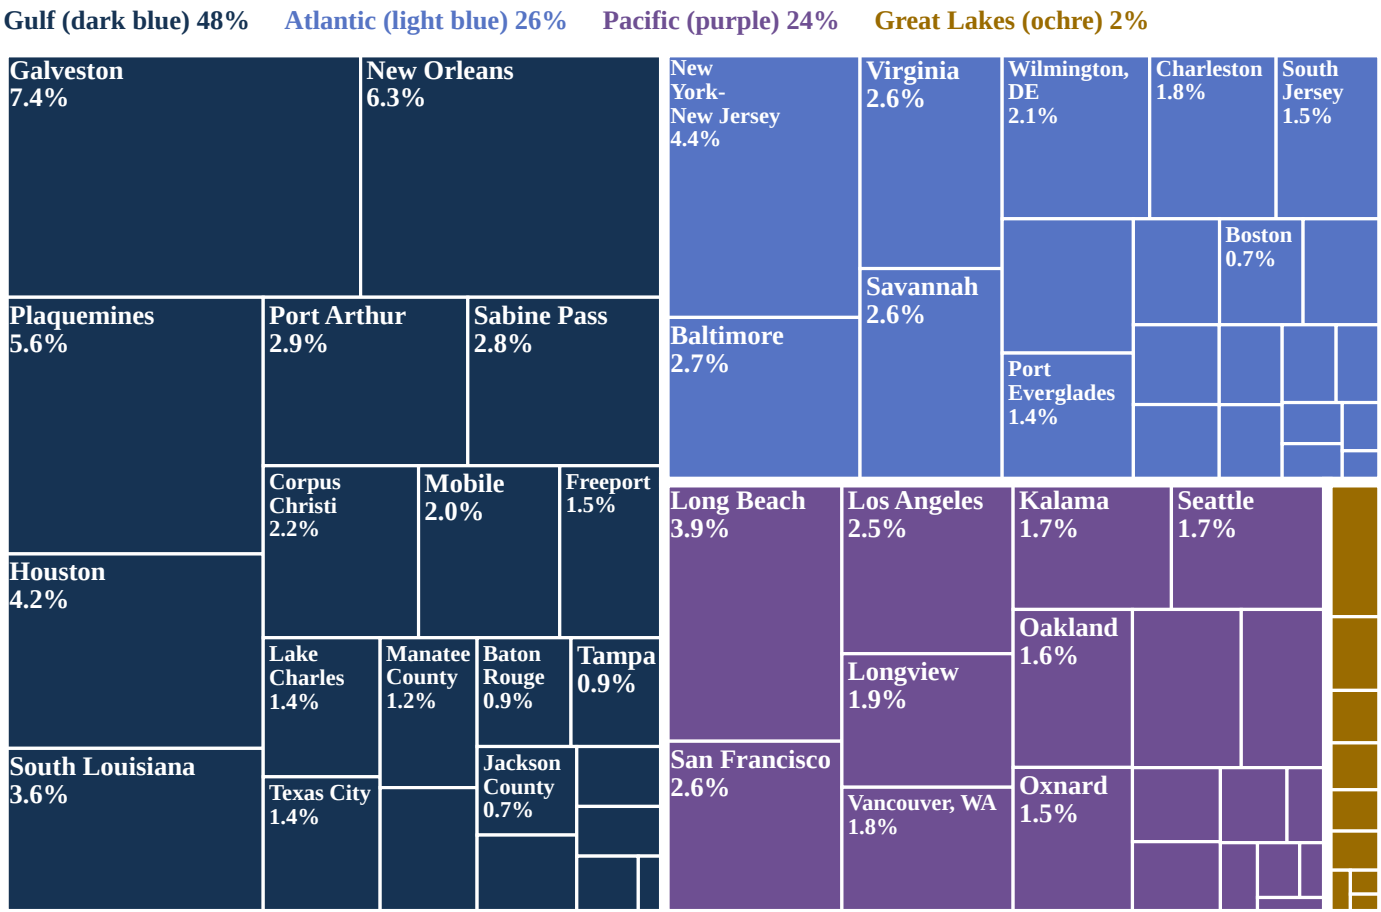
# Gulf ports take 48% of large-ship port visits; Galveston alone takes 7%

Share of large-ship port visits at the 73 deep-draft ports, grouped by coast, 2023 and 2024 together (area = share)



Source: NTIA analysis of MarineCadastre AIS, 104 sampled days in 2023 and 2024; large ships = cargo, tanker, passenger, military, and other seagoing ships 100 m or longer, plus tug-barges near the coast. Port visits = distinct large ships seen within 10 km of a deep-draft port (each 1 km cell assigned to its nearest port); a ship that calls at two ports counts at both.
