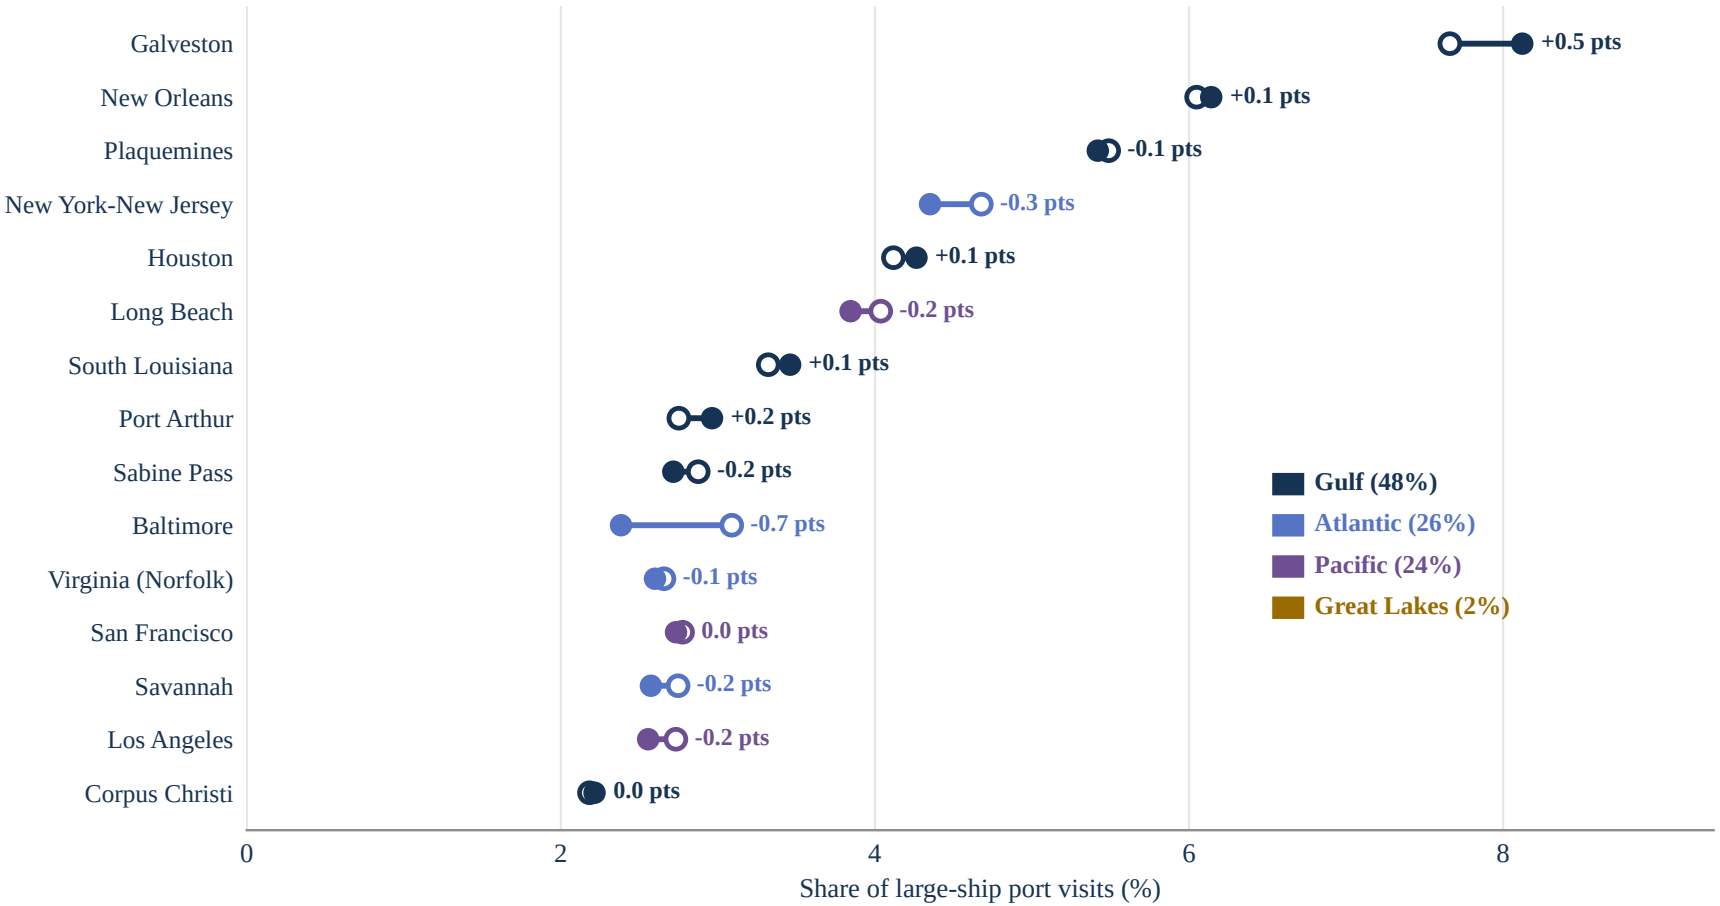
DRAFT//PRE-DECISIONAL

Port shares barely moved between years; the largest shift among the top 15 is 0.7 points at Baltimore

Share of large-ship port visits in 2023 (open circle) and 2024 (filled circle), the 15 busiest deep-draft ports



Source: NTIA analysis of MarineCadastre AIS, 104 sampled days in 2023 and 2024; large ships = cargo, tanker, passenger, military, and other seagoing ships 100 m or longer, plus tug-barges near the coast. Port visits = distinct large ships seen within 10 km of a deep-draft port (each 1 km cell assigned to its nearest port); a ship that calls at two ports counts at both.
