DRAFT//PRE-DECISIONAL

Large-ship routes in Alaska run the Inside Passage, Cook Inlet, Prince William Sound, and Unimak Pass, but shore receivers miss the lanes far offshore

Route cells east of 180°, 2018–2019: 26,983 cells of about 1 km from ship tracks (ship-days rule, dark blue) and 23,444 more from NOAA charted lanes (light blue); gray shows every cell a large ship crossed

Source: NTIA analysis of MarineCadastre AIS (Coast Guard shore receivers), 104 sampled days in 2018 and 2019; route cells crossed by large ships on at least 6 ship-days; Census 1:500,000 state outline. Analysis stops at 180 degrees.
