DRAFT//PRE-DECISIONAL

Large-ship routes ring Puerto Rico and run through the Mona and Anegada passages; 7 of 8 ports sit on them

Route cells around Puerto Rico and the U.S. Virgin Islands, 2024–2025, 43,845 cells of about 1 km (same rule as the lower 48); gray shows every cell a large ship crossed. Off the routes: Mayaguez

Source: NTIA analysis of MarineCadastre AIS, 104 sampled days in 2024 and 2025; route cells with 4 or more large ships in a year (2 near deep-draft ports), NOAA charted lanes, and S-band racons; Census 1:500,000 outlines.
