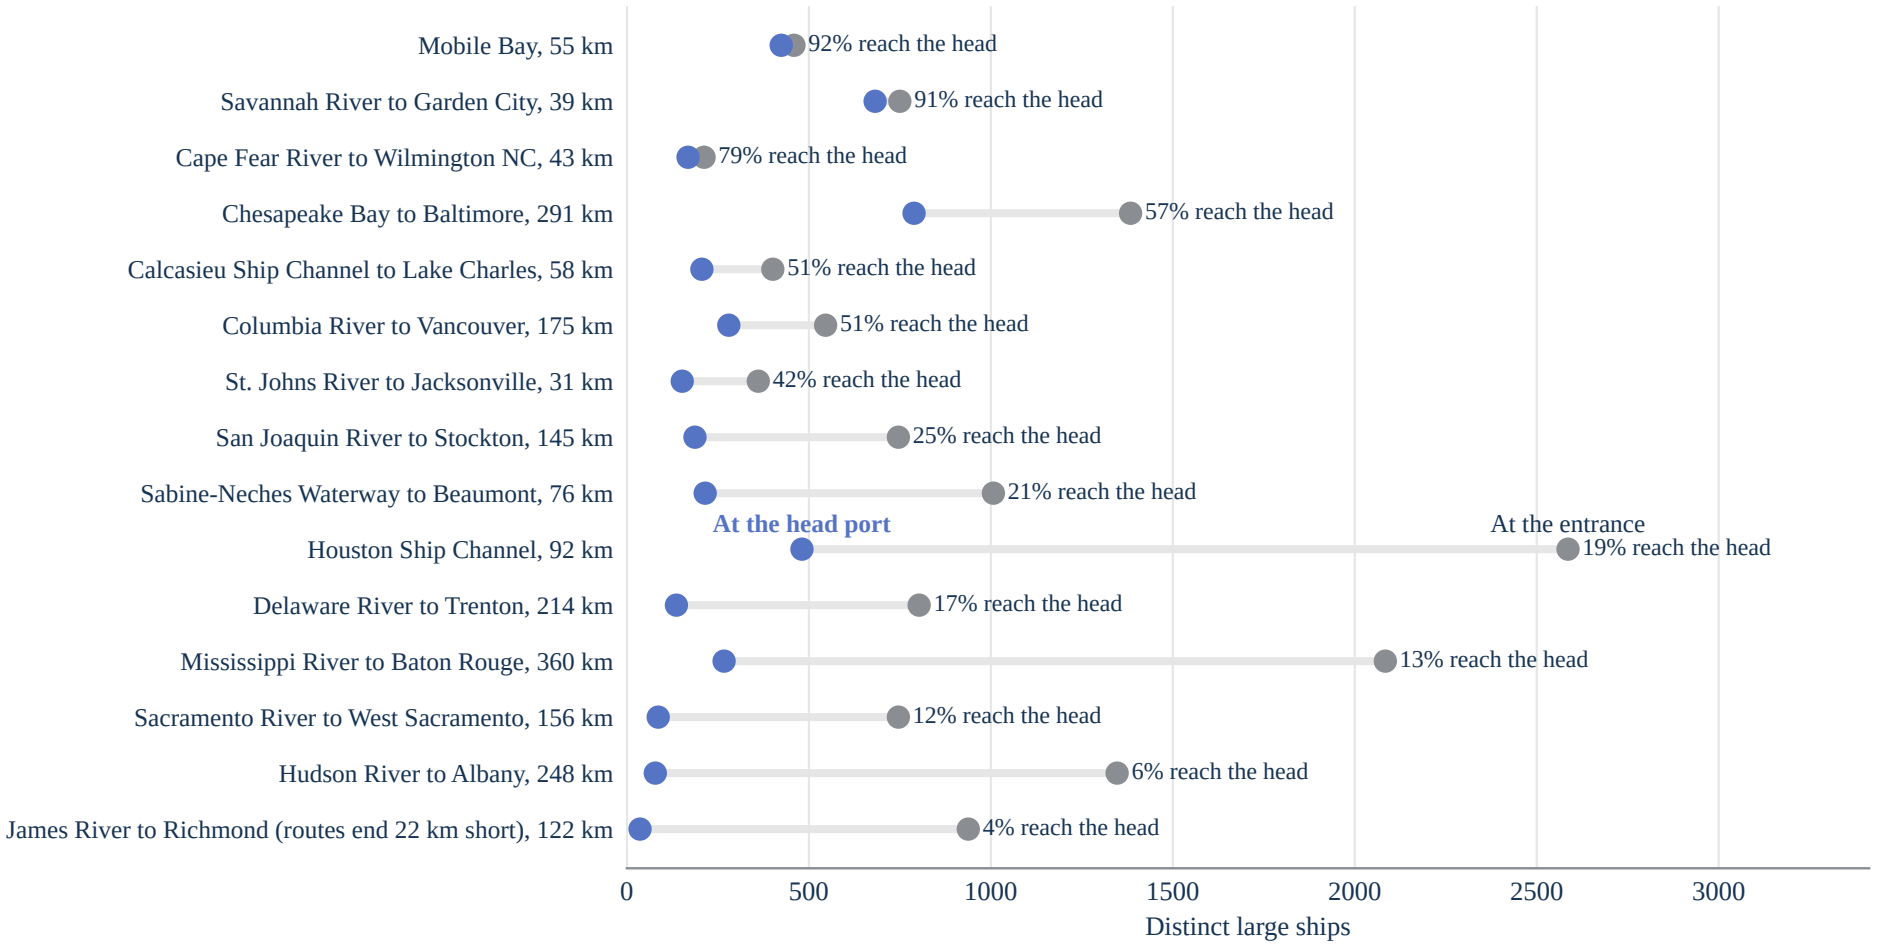
DRAFT//PRE-DECISIONAL

On 9 of 15 rivers and ship channels, fewer than half of the large ships at the entrance reach the head port

Distinct large ships within 3 km of the entrance and of the head port, 104 sampled days in 2023 and 2024



Source: NTIA analysis of MarineCadastre AIS, 104 sampled days in 2023 and 2024; large ships = cargo, tanker, passenger, military, and other seagoing ships 100 m or longer, plus tug-barges near the coast. Distance is measured along the large-ship route cells from the entrance. Entrance counts include ships bound for other ports near the entrance.
