DRAFT//PRE-DECISIONAL

The busiest 5% of hexagons carry 41% of large-ship traffic

Distinct large ships per 25 km hexagon on the large-ship routes, 2023 and 2024 together

Source: NTIA analysis of MarineCadastre AIS, 104 sampled days in 2023 and 2024; large ships = cargo, tanker, passenger, military, and other seagoing ships 100 m or longer, plus tug-barges near the coast. Hexagons are drawn on an equal-area (Albers) projection.
